# AZURE

OPEN TRAILERS

## WHY SHOULD YOU HAVE A HAPERT AZURE?

Bulky waste, sand, stone, garden waste, pallets or plants: you can transport it all without any embarrassment in our open trailers. Day in, day out if you like: that's what they've been made for. That's why you should have a HAPERT AZURE.

H-2

1

All of the braked models feature a bolt-on, V-shaped drawbar, high-quality fold-away support wheel and a strong overrun brake with a cast ball coupling.

2

The H models (flat-bed trailer featuring a loading platform above the wheels) are supplied with anodised fold-down aluminium dropsides and removable corner pillars.

3

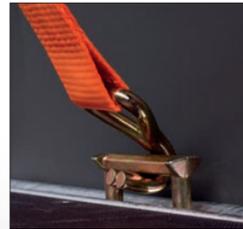

The H models have a U-profile at the rear. They also come prepared for the later addition of a storage compartment with drive-on ramps under the floor (with the exception of model H 260 x 150 cm).

4

Extra, ingeniously-designed hinged bushes have been fitted to the H models. The useful hook makes it easy to attach the load net. A fixing point integrated in the side is available as an option.

5

Each of the Azure models feature a binding bracket system integrated into the sides with a capacity of up to 1000 kg per piece as standard. This system is TÜV-certified.

6

The L models all feature multiplex or aluminium walls as standard. The Combi Protect Rail, sturdy side-wall supports, a removable ladderrack in the front and the steel mudguards also all come as standard with these models.

L-1

7

The entire Azure range features the HAPERT locking mechanism: a sturdy and easy to use built-in draw bolt locking mechanism, resulting in flat (side) walls. Rear panel cables are fitted to the aluminium rear panel.

8

Thanks to the sturdy chassis, the various models (both H and L) are available as single-axle trailers with a gross load capacity of 750 kg up to 1800 kg; a gross load capacity of up to 3500 kg applies for the tandem axle trailers.

10 YEAR CHASSIS WARRANTY

## BUILT TO LAST.

It is vital for you to have absolute confidence in your trailer, particularly when your operating processes depend on it too. That's why we develop the very strongest and sturdiest trailers you will find anywhere in Europe. Our tried-and-tested welding technology makes us unique and we supply transport solutions that have got what it takes to take on any job.

The extreme resilience of our trailers means they can be used day in, day out - a reliability you won't find anywhere else. This makes and keeps you mobile, at the lowest cost per kilometre. Whatever the challenge: BRING IT ON!

### Fitted as standard with:

- a high-quality welded and hot-dip galvanised steel chassis
- a 15 mm-thick multiplex floor panel with an anti-slip layer
- an aluminium rear panel
- lighting with a 13-pole plug and reversing light
- a high-quality fold-away jockey wheel for the braked models
- a whole range of different binding options
- four corner pillars with insertion options

### Packages

For the H model (except 260 x 150 cm) our "DRIVE-ON"- package is available. This package includes two, integrated drive-on ramps in aluminium, 2500 mm long and 2 heavy duty prop stands at the rear.

Parabolic suspension system including shockabsorbers is available as an option (from 335 x 180 cm).

For the L and H models different options and accessories are available.
